## Therapeutic Use Exemption (TUE) Checklist

Asthma

Prohibited substances: Beta-2-agonists & glucocorticoids

201-2723 chemin Lancaster Rd Ottawa ON Canada K1B 0B1 Tel/Tel + 1 613 521 3340 + 1 800 672 7775 Fax/Téléc + 1 613 521 3134 info@cces.ca www.cces.ca

This checklist provides the athlete and their physician with a list of requirements for a TUE application. A TUE application must include a completed form and a medical file that confirms the diagnosis and prescription. If it is not possible to submit all mandatory items on the checklist, please have the treating physician explain why.

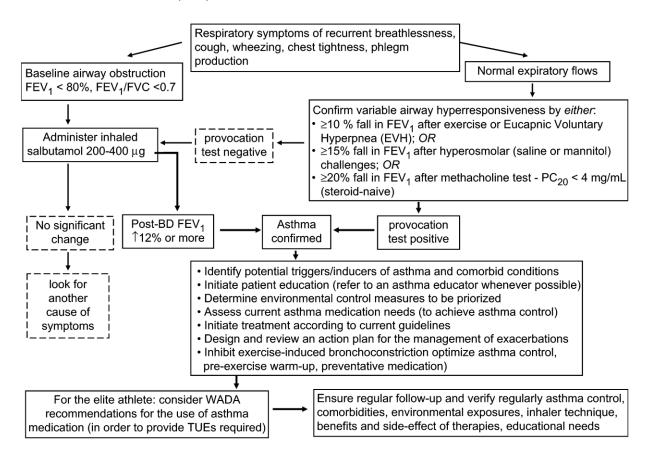

A complete application with a medical file will be reviewed by the CCES TUE Committee to assess whether it meets the criteria of the International Standard for Therapeutic Use Exemption (ISTUE). There are no guarantees that a TUE will be granted.

When an application is submitted without a complete medical file the CCES will advise the applicant which documents are missing and ask them to submit them.

TUE application form must include:
□ All sections completed in legible handwriting
□ All information submitted in English or French
□ A signature from the prescribing physician
Athlete's signature in all appropriate sections
A letter from the athlete's prescribing physician confirming you were seen within the current year (see Annex 1 for example)
Medical reports should include details of:
<ul> <li>Medical history: symptoms of airway obstruction, provocative stimuli, aggravating factors, exacerbations, age at onset, course of disease under treatment (specify)</li> </ul>
Indicate any medical history related to asthma: atopic disorders, allergies, acute exacerbations, childhood asthma, family history of asthma, other). Please provide details on frequency, severity, etc.
Findings on examination: airflow obstruction at rest, exclusion of differential diagnoses
Indicate the exact diagnosis: asthma, exercise-induced bronchoconstriction, exercise-induced asthma, other)
Summary of diagnostic test results: spirometry, if spirometry normal, include reversibility test, if both normal, include
provocation test (see table below)
Interpretation of symptoms, signs, and test results by respiratory physician
□ Beta-2-agonists and/or glucocorticoids prescribed including dosage, frequency, route of administration.
Note: Beta-2-agonists except for salbutamol, salmeterol, formoterol by inhalation and in therapeutic doses, all are prohibited a
all times. Glucocorticoids are only prohibited in competition and when given systemically.
Response to treatment with previous/current medication
Diagnostic tests results should include copies of:
Spirometry report with flow curve (see table below)
□ Spirometry report with flow curve after bronchodilator administration (reversibility test) if spirometry indicated above
shows normal findings (see table below)
Documentation (including spirometry report with flow curve) of a recognized provocation test if both spirometry reports
 indicted above show normal findings (see table below)
Additional information included (not mandatory)
Peak flow log, allergy test results, previous spirometry report(s), and provocation tests results

For more information about WADA's ISTUE criteria and additional information about the documentation to be submitted, please visit WADA's TUE Physician Guidelines - Asthma.

## BD: Bronchodilator; FVC: forced vital capacity
